To Prospective Students:

I had the pleasure of Mark's musical guidance & mentorship for 8 consecutive years. I began lessons with Mark as a complete beginner in music. Mark instructed me in guitar, and later piano. Before Mark I had no prior experience in music – however my musical journey has exposed me to different instructors and teachers that have influenced my life as well as my art and practice – Mark stands out above all.

Mark is the single greatest teacher I have encountered. Mark's greatest strength is understanding who his students are and offering them the exact knowledge they need to keep them hooked on music. His personal experience with and deep understanding of all genres of music allows him to bring the best out of his students and facilitate their growth – whatever their journey is.

I have collaborated with many other musicians who have all had Mark as the instructor as well, each of them with a unique musical passion. I have personally seen the growth and mastery of their instruments and art they achieved with Marks's guidance. My peers have often reflected to me the positive impact Mark has had on their lives, and the quality of Mark's person and professionalism.

There is no one I can recommend more than Mark Daum when it comes to music instruction. Whatever the music style is, whatever the passion is – Mark brings out the best.

Sincerely,
